AI BlogNest

IDEATION PHASE DOCUMENT — PROBLEM STATEMENTS

PROJECT ID	DATE
SWTID-2026-2363	29 September 2026

Objective: Articulate customer-centric problem statements for the AI BlogNest platform using the Empathy Framework. By understanding user challenges, barriers, and underlying emotional impacts, we establish clear requirements for automated, high-quality AI-assisted blogging solutions.

Customer Problem Statement Template Framework

I am	I'm trying to	But	Because	Which makes me feel
Customer profile & 3–4 key attributes	Core job or outcome to achieve	Obstacles & barriers faced	Root causes of the problem	Emotional reaction & personal impact

Defined Problem Statements for AI BlogNest

ID	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	**Solo Content Creator** Independent, busy, non-technical writer	consistently publish high-quality, long-form blog articles twice a week	writer's block and time-consuming manual research severely delay drafts	existing AI tools produce generic, robotic text that requires hours of heavy editing	**Overwhelmed & Exasperated**
PS-2	**SEO Specialist / Marketer** Data-driven, growth-focused agency lead	optimize articles for search engines to drive organic web traffic	published blog posts fail to rank well or capture target reader keywords	keyword research tools and blog writers work in silos without real-time SEO feedback	**Frustrated & Discouraged**
PS-3	**SaaS Startup Founder** Resource-constrained, brand-conscious	maintain a unique, professional brand tone across all marketing blogs	generated content sounds repetitive, bland, and inconsistent across posts	generic AI language models lack custom voice guidelines and audience persona context	**Anxious & Disappointed**
PS-4	**Digital Publication Manager** Multi-channel publisher, tight deadlines	seamlessly format, schedule, and cross-publish posts to multiple CMS channels	reformatting content and images for WordPress, Medium, and Dev.to takes hours	current platforms lack integrated multi-platform distribution automation	**Exhausted & Drained**

Empathy Analysis & Persona Problem Breakdown

Detailed empathy mapping for key AI BlogNest user segments to validate feature requirements against emotional and operational friction points.

Tech Blogger

Target Persona 1

CUSTOMER ATTRIBUTES
Solitary writer, balancing full-time job with tech blogging, values authenticity.

GOAL / JOB TO BE DONE
Generate 2,000-word comprehensive tech guides quickly with relevant visual diagrams.

ROOT CAUSE & BARRIER
Generic AI models hallucinate technical details, requiring tedious fact-checking and heavy rewriting, neutralizing time saved.

AI BLOGNEST SOLUTION ALIGNMENT
Inject verified technical context modules and automatic visual/code block integration directly in the editor.

SEO Growth Lead

Target Persona 2

CUSTOMER ATTRIBUTES
Metrics-focused, manages 5+ niche client blogs, tight turnaround requirements.

GOAL / JOB TO BE DONE
Rank on Google Page 1 for competitive long-tail search queries.

ROOT CAUSE & BARRIER
Manual keyword insertion feels forced, while external SEO auditing tools are expensive and disconnected from writing workflows.

AI BLOGNEST SOLUTION ALIGNMENT
Real-time SEO content scoring, semantic LSI keyword suggestions, and dynamic meta-tag generation during drafting.

Startup Founder

Target Persona 3

CUSTOMER ATTRIBUTES
Non-writer, building brand presence, limited budget for full-time content staff.

GOAL / JOB TO BE DONE
Build thought leadership and convert blog readers into product signups.

ROOT CAUSE & BARRIER
Drafts generated by basic LLMs lack company voice calibration and call-to-action (CTA) integration.

AI BLOGNEST SOLUTION ALIGNMENT
Brand Voice Memory engine that ingests past company collateral and automatically embeds tailored CTAs.

Summary for AI BlogNest Product Strategy

Addressing these customer problem statements requires AI BlogNest to focus on 3 core product pillars:

1. Contextual Brand Memory
2. Native SEO Intelligence
3. One-Click Multi-CMS Publishing
